

SHOES WITH A MONEY BACKING.

UNDER the present leather market there is going on among the manufacturers a practice of substituting a composition of pasteboard and ground scraps of leather to take the place of real leather. Wherever this composition is used it shortens the life of the shoe. It cannot be told from the outside appearance of the shoe. Therefore it pays the prospective shoe buyer to know what he is getting. The only way to know is to buy a shoe with a reputation back of it. Here are a few lines that we guarantee to be absolutely solid in every respect, if they are not you get your money back:

Forcing His Hand.

There was to be a circus in town next day, and Robert wished to go and see it upland, so he sought to obtain his father's consent. The first question his father put to him on being approached was, "Have you asked your mother?"

"Yes, sir," was Robert's prompt reply.

"What did she say?" the father pursued.

"She said I couldn't go," was the frank rejoinder.

"What do you mean, Robert, by coming to me to ask to do a thing after your mother has told you you could not do it?"

"Well, papa," the little fellow observed, "I heard you say last week that you're the boss of this ranch, and I thought it was about time for you to assert yourself."—Exchange.

TEN YEARS IN BED.

"For ten years I was confined to my bed with disease of my kidneys," writes H. A. Gray, J. P., of Oakville, Ind. It was so severe that I could not move part of the time. I consulted the very best medical skill available, but could get no relief until Foley's Kidney Cure was recommended to me. It has been a God-send to me."

The Boy Guessed Right.

They were getting a kindergarten lesson. The teacher taught them very simple subjects. She touched a table. "What is this?"

"Wood."

"What is this?" she asked as she touched the fender.

"Iron."

"What is this?" indicating a bottle.

"What is this?" and she touched her watch chain.

"Brass," said one small boy, and then she changed the subject.—Spokesman Review.

The Limit of Life

The most eminent medical scientists are unanimous in the conclusion that the generally accepted limitation of human life is many years below the attainment possible with the advanced knowledge of which the race is now possessed. The critical period that determines its duration seems to be between 50 and 60; the proper care of the body during this decade cannot be too strongly urged; carelessness then being fatal to longevity. Nature's best helper after 50 years is Electric Bitters, the scientific tonic medicine that revitalizes every organ of the body. Guaranteed by the Pickens Drug Co. Druggists, 50c.

The God of Love.

Almost as ancient as the earth herself was Eros, the personification of love. Hesiod relates that he was among the first of existing things and that he assisted the earth in bringing forth from chaos the earliest forms of life and beauty. Aristophanes and others wrote of Eros as the son of night. Later poets sang of him as the son of Ares and Aphrodite and honored him as the sweet minded promoter of human affections. They represented him as a fair faced boy winged and carrying a bow with which to inflict sweet wounds upon those who came within range. Nor has Eros ceased to exist even in this practical age, for to this day the poets sing of this little winged god as skillful and as pitiless as in the days of old. The philosophic myth of Eros and Psyche is one of the most beautiful of the ancient allegories.—Pearson's Weekly.

Coke.

The silvery luster shown by many of the best grades of coke is said to be due principally to the decomposition of some of the gases evolved during the process of coking, and the deposition of a thin coating of pure carbon on the surface of the coke cells. This thin coating protects the cells from alteration in the air and is accountable for the durability shown by many cokes.
